

THE KENSINGTON

An Assisted Senior Care Facility

community sponsor spotlight

For the last year, Kensington Senior Living has been committed to bringing a loving and comprehensive lifestyle of care and service to Redondo Beach area seniors. This past July, they opened the doors to The Kensington Redondo Beach, an assisted living and memory care residence located on the legendary Pacific Coast Highway, only two blocks from the Esplanade.

The Kensington was developed by a small group of career-long senior living professionals who sought to elevate the assisted living model of care. They are passionate about excellence in every detail of service, and they promise to love and care for your family as they do their own. To honor that promise, they built a residence that is not only beautiful inside and out, but is also a place where they'd want their own parents to live, if necessary.

The Kensington environment reflects mindful sensitivity to the needs of senior adults. For example, lighting is generous. Common areas foster opportunities for socialization. The decor is tastefully elegant yet comfortable. Suite styles are available in a wide variety of options.

But, what makes The Kensington unforgettably striking is the warm, genuine welcome that awaits every guest

who crosses the threshold. A sumptuous blend of expertise, thoughtful regard and kind leadership is impossible to miss.

There is no doubt that what breathes life into The Kensington is a best-in-class team of leaders, care specialists and support staff. They are happy, cordial, interested and superbly capable. They make The Kensington a feel-good place for residents, their families, each other and all who visit. And, they deliver a scope of care that is more comprehensive than many other traditional assisted living communities are able to provide.

An enhanced assisted living care model includes a full spectrum of clinical support, delivered by a diverse team, such as licensed nurses on-site around the clock, an on-call medical director, primary care managers and a network of area specialists. Care offerings include medication and diabetes management (with or without injections), hydration and nutrition programs, fitness services, physical therapy and end-of-life care. Frail seniors are welcome, and residents do not need to move out if needs and preferences change.

Two levels of memory care address needs and challenges that are unique to different degrees and stages of memory loss. Connections is for residents coping with the early to middle stages and who are able to maintain some independence. Haven is for residents experiencing later stages and who require a higher level of attention. Both neighborhoods are secured 24/7 and are staffed by compassionate care managers who strive to preserve the highest quality of life for each resident. Programs and activities focus on strengths, maximize comfort and relieve anxiety. And, because memory loss is a family affair, ongoing support is available for families to help anticipate change and manage the fallout.

The Kensington team is committed to delivering on their promise to love and care for your family as they do their own. They accommodate couples. They welcome pets. They respect legacy. And they celebrate the bonds of friendship by aspiring to build and sustain ongoing relationships with residents, families and all who partner to serve the greater Redondo Beach community. Also, because they are excited to introduce you to the vibrant Kensington lifestyle, profound devotion to family and uncompromising care that come with residency, they welcome inquiries, visits and warm hellos, always.
